1774

DATE MAILED: 07/14/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/032,558	Applicant(s) CHO ET AL.	
	Examiner Jill M. Gray	Art Unit 1774	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 April 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1 and 2 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1 is/are rejected.
- 7) ☒ Claim(s) 2 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Election/Restriction

The cancellation of non-elected claim 3 has been noted. Accordingly, claims 1 and 2 are under prosecution.

Response to Amendment

The rejection of claims 1 and 2 under 35 U.S.C. 103(a) as being unpatentable over Rowan et al. 4,851,172 in view of Japanese patent abstract JP070819 is withdrawn in view of applicants' arguments.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

More specifically, in A), line 4, the language "the extruded yarn" lacks the proper antecedent basis because there is no positive recitation that the melt extruded polymer is formed into a yarn. Also, the language of "passing the extruded yarn through a delay quenching zone and then a quenching zone to solidify the yarn to have an intrinsic viscosity of 0.88 or more" is indefinite because the intrinsic viscosity is a property of the polymer per se, and not necessarily the solidification of the polymer to form yarns. Accordingly, the metes and bounds of this language are not clear. Step B) is vague and indefinite because the language of "oiling and taking up the undrawn yarn at an

Art Unit: 1774

appropriate speed with the density of 1.338 to 1.365 g/cm³ does not provide a positive recitation of the yarn having the referenced density, rather, this language appears to refer to the speed. In addition, the language of "an appropriate speed" is vague. Take up speeds vary dependent upon the specific process being used and desired properties in the end product. Accordingly, the language of "an appropriate speed" does not clearly define the metes and bounds of the present inventive process.

General Remarks

In claim 1, step C), line 4, the suggested language is "relaxing the heat-set yarn".

Allowable Subject Matter

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not teach or suggest a process of preparing an industrial polyester filament yarn wherein the yarn is drawn in three stages at the glass transition temperature or lower and the draw ratio is greater in the first stage than in the second or third stages and the draw ratio in the third stage is greater than in the second stage.

Conclusion

Art Unit: 1774

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Murase et al, 5,137,670 teach a process of producing industrial polyester fiber having strength of at least 7.0 g/d comprising melt-spinning polyethylene terephthalate to form yarns, cooling and solidifying, imparting an oiling agent and taking up the undrawn yarn, and drawing the yarn at a total draw ratio of 1.5-2.3 in at least 2 stages. Wherein the temperature of the first stage is at or near the glass transition temperature and the temperature of the second stage is elevated.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jill M. Gray whose telephone number is 571-272-1524. The examiner can normally be reached on M-F 10:30-7:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye can be reached on 571-272-3186. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
